Virtual Nationwide Service

## Core Competencies

Cyvatar delivers fully-managed, continuous cybersecurity-as-a-service (CSaaS) to reduce risk and ensure compliance for highly regulated industries, technology innovators, and financial services. Our key competencies include:

- **Continuous Remediation:** Proactive identification and fixing of vulnerabilities to reduce vendor risk exposure.
- **Compliance Lifecycle Management:** Full-service compliance management for SOC 2, PCI, HIPAA, and more — including audit-ready reporting and evidence collection.
- **Third-Party Risk Management:** Continuous monitoring and security for vendor ecosystems and supply chain partners.
- **Freemium Platform Access:** Free risk assessments, policy templates, and expert advisory to support SMB partners in your supply chain.
- **All-in-One Risk & Compliance Platform:** MyCyvatar tracks real-time risk posture, remediation progress, and compliance status in a single view.
- **Comprehensive Security Coverage:** Protecting endpoints, cloud, email, mobile, and DNS using trusted tools like Tanium, Zimperium, and Microsoft Defender.

## Differentiators

**Cyvatar stands apart by not just identifying risks — we actively fix what we find.** Our approach uniquely aligns with S&P Global's emphasis on vendor risk, compliance, and responsible business practices:

- **Actionable Security:** Immediate remediation instead of passive monitoring.
- **Insurance-Driven Security:** Every control we implement directly maps to cyber insurance requirements, helping lower premiums and simplifying renewal processes.
- **Cost-Free Onboarding for SMB Vendors:** Cyvatar's Freemium model makes cybersecurity accessible for smaller supply chain partners, reducing systemic vendor risk.
- **Vendor Risk Management:** MyCyvatar delivers proactive oversight across your vendor ecosystem.
- **Single Pane of Glass:** MyCyvatar centralizes risk, compliance, and remediation data — simplifying oversight for risk teams.
- **Industry-Specific Expertise:** Cyvatar's solutions are designed for financial services, technology, and legal industry compliance requirements.

## Past Performance

Cyvatar's proven success includes:

- **Mastercard:** Delivering cybersecurity-as-a-service through Mastercard's RiskRecon for SMB customers.
- **Americor:** Achieved full SOC 2 compliance while reducing cyber risk across all functions.
- **Stoplight:** Enabled secure hypergrowth with continuous remediation and compliance alignment.
- **Legal & Financial Firms:** Delivered fully-managed cybersecurity programs, ensuring insurance compliance and reducing third-party risk.
