

CYVATAR^{AI}

The Future of Cybersecurity.

Comprehensive solutions to meet your most complex compliance and security needs.

Cyvatar recognized the need to engage differently with our customers and created subscriptions that combine the people, processes, and technology to help customers across the goal line and to deliver value and measurable outcomes to your board. We have thoughtfully built out our subscriptions to help you meet compliance requirements as well as achieve "real" security within your environment. When you choose a Cyvatar subscription solution – you're investing in evolution, your future, and sustainable success.

Solution Portfolio:

Threat and Vulnerability Management (TVM)

Identify, prioritize, and remediate threats and vulnerabilities across your IT environment. Stay proactive with continuous security and compliance.

Secure Endpoint Management (SEM)

Detect and respond to security events in real-time. Our SEM service provides continuous monitoring and defense for all devices in your network.

Cloud SaaS Security Management (CSM)

Ensure comprehensive cybersecurity for your cloud environments. Protect your data and applications with robust security measures and compliance assurance.

Email Security Management (ESM)

Protect against phishing, malware, and other email-based threats. Our ESM service continuously monitors and filters email traffic to keep you secure.

DNS Security Management (DSM)

Secure your DNS infrastructure from cyber threats. Prevent DNS-based attacks and maintain network integrity and user trust with robust DNS protection.

Mobile Threat Defense (MTD)

Provide advanced protection for mobile devices, detecting and neutralizing threats in real-time. Secure your mobile data and applications for safe on-the-go operations.

Security Awareness Training (SAT)

Empower your employees to recognize and respond to cyber threats. Enhance your security posture through interactive training sessions.

Multi-Factor Authentication (MFA)

Add an extra layer of security with advanced authentication methods. Ensure only authorized users can access your systems, reducing the risk of unauthorized access.

IT Asset Management (ITAM)

Track and manage all your IT assets efficiently. Optimize resource utilization and ensure your assets remain secure and compliant.

Cyber Insurance by Cysurance

Protect your business from the financial impact of cyber incidents. Comprehensive coverage plans offer peace of mind against data breaches and cyber attacks.
